EDUCATION

University of Texas at Dallas

Aug 2024 – May 2028

Bachelor of Science in Computer Science (Computing Scholars Honors) | GPA: 4.0

Richardson, TX

- Relevant Coursework: Data Structures & Algorithms (in progress), Computer Architecture, Systems Programming, Discrete Mathematics, Linear Algebra, Computer Science II

Blue Valley West High School

Aug 2020 – May 2024

Weighted GPA: 4.75/4.0 | Top 1% of graduating class

Overland Park, KS

EXPERIENCE

Cloud Engineering Intern

June 2025 – August 2025

Thorben Consulting

Remote

- Designed and implemented the data processing architecture for a **Retrieval-Augmented Generation (RAG) workflow** on government PowerPoint files, **adopted by 10 interns** as the standard framework
- Developed an automated image-processing **Lambda function** integrating **Amazon Rekognition** and **Amazon Nova Lite**, **eliminating manual intervention** in the pipeline.
- Earned **AWS Cloud Practitioner** certification; currently pursuing **AWS Developer Associate**.

Research Lead

May 2025 – Present

ACM Research

Richardson, TX

- Developed a early **intrusion detection system** using **LSTMs** to process **raw network packets** with an **76%** accuracy over 4 classes to **detect cyber attacks early**.
- **Leading a research team next semester** to develop AI models and present findings at the ACM symposium.

Undergraduate Researcher

May 2024 – August 2024

Anson L. Clark Summer Research Program @ the University of Texas at Dallas

Richardson, TX

- Developed a machine learning model using **diffusion and transformers** that takes spoken audio to generate a synchronized 3D talking face.
- Achieved a **jaw pose error rate of 0.00190**, demonstrating the model's accurate speech movements predictions.

PROJECTS

Predicting the Effect of Missense Mutations on Protein Growth

Jan 2025 - May 2025

ACM Research

- **Won Best Research Award** (1st place) at ACM Symposium @ UTD.
- Achieved **84.6% classification accuracy**, **outperforming** baseline model **by 23%**.
- Collaborated in a **5-member team** to build and evaluate a **soft-voting ensemble model** combining Random Forest, Gradient Boosting, and SVM to classify missense mutations as low or high growth.
- Skills: Python, PyTorch, Pandas

Multithreaded Database Server and Client in C

May 2025

CS 3377 Systems Programming in Unix | [GitHub Link](#)

- Developed a **multithreaded TCP client-server database system** in C, supporting **concurrent client connections**, **persistent record storage**, and **IPv4/IPv6 compatibility**.
- Skills: C, Sockets, Multithreading, File handling, Makefile Scripting

Photo-Sharing Web App: UI/UX Track Winner

April 2025

WeHack 2025 | [GitHub Link](#)

- **Went solo** to build a full-stack photo-sharing web app with **collaborative albums**, **comments**, and a novel **Time Capsule feature**, awarded **UI/UX Track Winner at WeHack 2025**
- Skills: React, Flask, MongoDB

Flight Optimizer: 3rd Place General Track

Jan 2025

HackReason 2025 | [GitHub Link](#)

- Generates **optimized flight routes with s(CASP) logic programming** based on user-inputted budget, dates, and destinations, using **SerpAPI to scrape Google Flights and Hotels** for data-driven travel suggestions.
- Skills: s(CASP), React.js, Python, SerpAPI

TECHNICAL SKILLS

Languages: C++, Python, C, Java, JavaScript

Frameworks & Tools: React, Flask, MongoDB, PyTorch, AWS Lambda, Node.js
